Foodmarketing GmbH

Highlights

QUALITY

As experts for food products we are aware of the specific requirements of our partners in the European wholesale and retail market as well as in the HoReCa market. We also understand the frequent problems that accompany the import of food products from foreign countries. In this regard, one major issue is the legal declaration on the product label.

We are your reliable partner. The safety of our traded food products receives our utmost attention. As a certified IFS Broker we do not only place high demands on ourselves but also on our suppliers all around the world.

Prior to listing, any product must pass an extensive quality check. This also includes a declaration check to ensure that the label complies with all relevant legal requirements and, more importantly, is safe for consumers. At the same time, we also analyze the complete supply chain up to the producer in the country of origin. Many of our suppliers are certified according to a quality standard that is recognized by GFSI (e.g. IFS Food, BRC, FSSC 22000). In addition, we also conduct products analytics with accredited laboratories regularly based on an ongoing risk assessment.
